

LABORATORY SAFETY RULES

1. Read and be familiar with current lab procedure.
2. Wear required personal protective equipment (goggles, gloves, etc.)
3. Know the location of eyewashes, emergency showers, and fire extinguishers.
4. Wash according to instruction if any hazardous materials splash on you.
5. Keep work areas clean.
6. Do not eat, drink, use tobacco products, or apply make-up or lotion in this laboratory.
7. Dispose of all materials according to required procedures:
 - Hazardous chemicals in labeled waste containers
 - Biohazardous materials in biohazard bags
 - Glass in glass waste containers
 - Metal sharps in metal sharps containers
8. Wash hands before leaving the lab.
